Yone,

I would like to discuss the history of the area and what enforcement action EPA initiated and the conditions required to bring the area back into compliance. I'm available next Tuesday, 11/12 afternoon, Wednesday, 11/13 before 2pm and Thursday, 11/14 afternoon.

Thanks,
Rochelle

Hi Rochelle,

I have a resolved wetlands case that borders your outlined area to the north and next to Kingshighway. What would you like to talk about? I believe the city of East St. Louis owns most of that land in your map. I am available next week, just suggest some dates and times that work for you.

Thanks,

Yone Yu

Subject: City of East St. Louis

Yone,

I am on Region 5's EJ and Community Revitalization Council workgroup which is spearheaded by HQs. In FY2019, Region 5 selected six cities (East St. Louis, IL, South Bend, IN, Detroit, MI, Duluth, MN, Lorain, OH and Superior, WI) to conduct community initiatives and activities. I am the lead for East St. Louis and have been working with the City and community for over 2 years on environmental and public health concerns/issues. One main issue within the community is flooding.

Ex. 5 Deliberative Process (DP)

In July, I met with the newly elected Mayor, his assistant and the City Manager to discuss our continuing partnership and his priority for the City of East St. Louis. The Mayor was very concerned about the water continuing to rise due to rain in this area, near residential homes, around Summit (Marybelle) and North 60 Street that has some declared wetlands. It's my understanding by Illinois EPA that Region 5 has an enforcement case against the property owner for filling in the wetland. They believed the landowner has restored the wetland to EPA's satisfaction. I was referred to you as the contact for this site to discuss further.

Ex. 5 Deliberative Process (DP)

Are you available this week so we can meet and discuss? Let me know.

Thanks,
